MERN Stack Developer—1.7 Years Experience

PROFESSIONAL EXPERIENCE

• AllHeart Web

MERN Stack Developer

Chandigarh, India

July 2025 – Present

- **Frontend & Backend Development:** Contributing to a multi-application SaaS platform, building features across both the frontend and backend layers of the system.
- **Responsive UI Development:** Developing responsive, performant user interfaces using React.js, Next.js, and Tailwind CSS for a multi-tenant SaaS product.
- **API & Authentication:** Building and maintaining REST APIs and authentication systems using Node.js and Express.js to support secure, scalable application workflows.
- **Search & Real-Time Features:** Implementing search functionality using Elasticsearch and real-time features to enhance product usability and user experience.
- **Performance Optimization:** Optimizing application performance through caching strategies using Redis and efficient data handling with MongoDB and MySQL.

Project: MarketXY — Domain Intelligence Platform

Developed and maintained a domain research platform with 600M+ domain records, working across 3 web applications with a shared Node.js backend.

- **Built** responsive UI components using React.js, Next.js 15, and Tailwind CSS for the public website, client portal, and admin panel.
- **Developed** REST APIs in Node.js/Express with JWT authentication and role-based access control (RBAC).
- **Worked** with MongoDB and Elasticsearch to handle domain search, DNS records, IP/ASN database, SSL certificates, and email data.
- **Integrated** Stripe payment gateway for subscription and billing management in the client dashboard.
- **Implemented** an async data export feature (CSV/Excel) using BullMQ job queues and ExcelJS.
- **Used** Redis for caching and rate limiting to improve API performance.
- **Managed** state with Redux Toolkit and TanStack React Query across all three frontend applications.
- **Set up** cron jobs for scheduled data updates and cache cleanup.
- **Collaborated** on API documentation using Postman collections.

Tech Stack: Next.js, React.js, Node.js, Express.js, MongoDB, Elasticsearch, Redis, Redux Toolkit, Tailwind CSS, Stripe, Docker, REST APIs

Project: Full-Stack API Monitoring Platform (CRM Dashboard)

React 19 · Express 5 · MongoDB · Redis · BullMQ · Tailwind CSS

- **Designed and built** a multi-tenant SaaS API monitoring platform that continuously tracks external API health (uptime, latency, status codes) using scheduled BullMQ workers running every minute.
- **Implemented** an automated incident management system that detects status changes, creates/resolves incidents, and dispatches email alerts via a dedicated email microservice.
- **Built** a cron job heartbeat monitor using an inbound ping-based system to detect missed or late scheduled jobs with configurable grace periods.
- **Developed** a React 19 frontend with server-side pagination/filtering table components, real-time dashboards (SLO, traffic, latency, saturation), and permission-based sidebar navigation.
- **Engineered** multi-tenant architecture with per-tenant MongoDB connections and separate analytics pipelines (endpoint metrics, request logs, traces).
- **Integrated** Redis + BullMQ for job queue persistence with automatic re-sync on Redis flush to ensure zero job loss.

• Pisoft Informatics Pvt. Ltd.

MERN Stack Developer

Mohali district

January 2025 – July 2025

- **Full Stack Development:** Worked across the MERN stack (MongoDB, Express.js, React.js, Node.js) to build and maintain web application features.
- **Frontend Engineering:** Built reusable, responsive UI components with React.js and Redux Toolkit, improving consistency and maintainability across the codebase.

- **Backend Engineering:** Developed REST APIs with Node.js and Express.js, integrating MongoDB and MySQL for data persistence.
- **Containerization:** Used Docker to streamline local development and deployment workflows.

TECHNICAL PROJECTS

- **Multi-Application SaaS Platform (React.js, Next.js, Node.js, Express.js, MongoDB, Elasticsearch, Redis):**
Contributing to a multi-tenant SaaS platform spanning several applications, building responsive frontend interfaces and backend REST APIs, implementing authentication, search functionality, and real-time features, while optimizing performance with Redis caching.

TECHNICAL SKILLS

- **Programming:** JavaScript, Python
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs
- **Databases & Search:** MongoDB, MySQL, Redis, Elasticsearch
- **Tools & Platforms:** Docker, Git/GitHub
- **Languages:** Hindi (Full Professional), English (Limited Working)

EDUCATION

- **Punjab Technical University**
Bachelor of Technology – Computer Science *September 2021 – June 2025*
- **Zila School Chhapra, Saran (BSEB)**
Intermediate, Mathematics and Science *June 2018 – February 2020*
- **Utkramit M S Panapur Mohammedpur, Saran**
Matriculation *March 2017 – May 2018*
